

PROJECT MANAGEMENT SOLUTIONS THAT SIMPLY WORK.

Oracle Primavera P6 Pro R8 Tips & Tricks

**Don McNatty, PSP
Certified P6 Trainer/Implementation Specialist**

Monthly Technical Webinar Series
February 2013

Thank you for joining today's technical webinar

- **Mute** – all call in phones are automatically muted in order to preserve the quality of the audio for all attendees.
- **Questions** – during the session, questions can be submitted through the Questions Box on the right side of the screen . We will try to address your questions at the end of the presentation, time permitting.
- **Follow up** – all registrants will receive an Excel file listing all questions and responses along with a link to the recorded webinar.

Safe Harbor

PROJECT MANAGEMENT SOLUTIONS THAT SIMPLY WORK.

- Fill Down Command
- XML File Import
- Primavera Hotkeys
- Indicators for Schedule Performance
- User Defined Fields to Manage Layouts
- How to display the “true current schedule”
- Set a “Day of Week” Column for Start
- Activity Steps – details and earned value
- Dealing with “fractured durations”
- Dealing with “12:00am” start dates

Fill Down Command

When the same value needs to be copied to other rows in a column, the fill down feature lets you do that quickly.

- Process:
 - 1) Works in all windows with table views.
 - 2) Select a source “cell” in a row
 - 3) Select one or more “destination” rows
 - 4) Copy the source value to the destination rows using either “Edit, Fill Down” or “Ctrl-E”.

Example – Fill Down

Year/ Month	Activity	Activity Name	Orig Dur	Rem Dur	Start	Finish	Total Float	Update Title
A			76.00d	76.00d	20-Aug-12 A	07-Dec-12	8.00d

Edit/Fill Down or Ctrl-E to execute the command

XML File Import

The XML file import format allows a greater level of control for importing "Global" data than XER imports.

- Process:
 - 1) File, Import...
- XML Export/Import is limited to a single project
- XER Export/Import supports multiple projects
- P6 EPPM (web) only supports XML
- XML supports more choices for Global Data Import Control

XML File Import

XML Import

Primavera Hotkeys

There are various Hotkeys available within P6 Client.

Command	Hotkeys
Create new project	Ctrl+N
Open an existing project	Ctrl+O
Close open projects	Ctrl+W
Commit changes	F10
Refresh current screen	F5
Undo	Ctrl+Z
Reorganize layout	Shift+F2
Schedule	F9
Level Resources	Shift+F9
Find next	F3
Fill-down	Ctrl+E
Spell Check	F7

Indicators for Critical Activities

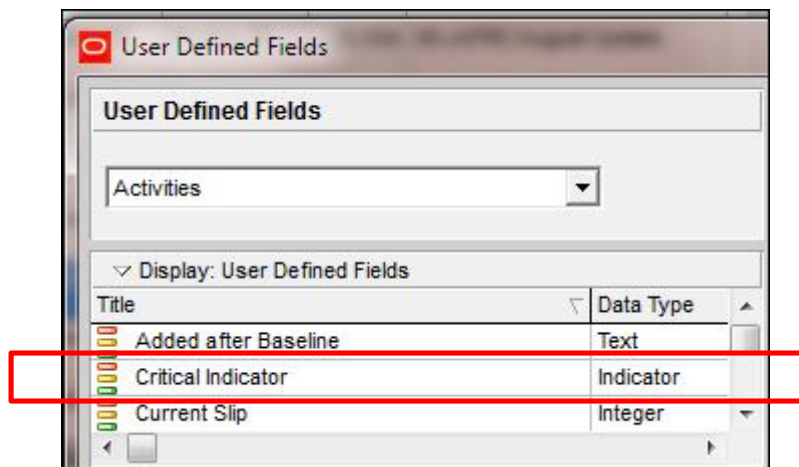

Using a combination of Global Change and “Indicators” you can graphically communicate in a Layout.

- User Defined Fields, Type = Indicator
- Manage manually or with Global Change
- Example:
 1. Create an Indicator for “Critical”
 2. Create a Global Change to Set Indicator to Red if the activity is critical

Indicator for Critical Activity

- For Activity List Reports (no bar chart)

1. Create a User Defined Field

Indicator for Critical Activity

2. Set up as a column in a Layout

Year/ Month	Critical Indicator	Activity	Activity Name	Orig Dur	Rem Dur	Start	Finish
A				76.00d	76.00d	20-Aug-12 A	07-Dec-12
1208		FR-MAS0010	BID/AWARD MASONRY	15.00d	6.00d	20-Aug-12 A	31-Aug-12
1208		FR-MAS0020	SFA STONE VENEER - REVISED	10.00d	10.00d	04-Sep-12	17-Sep-12

User Defined Fields to Manage Layouts

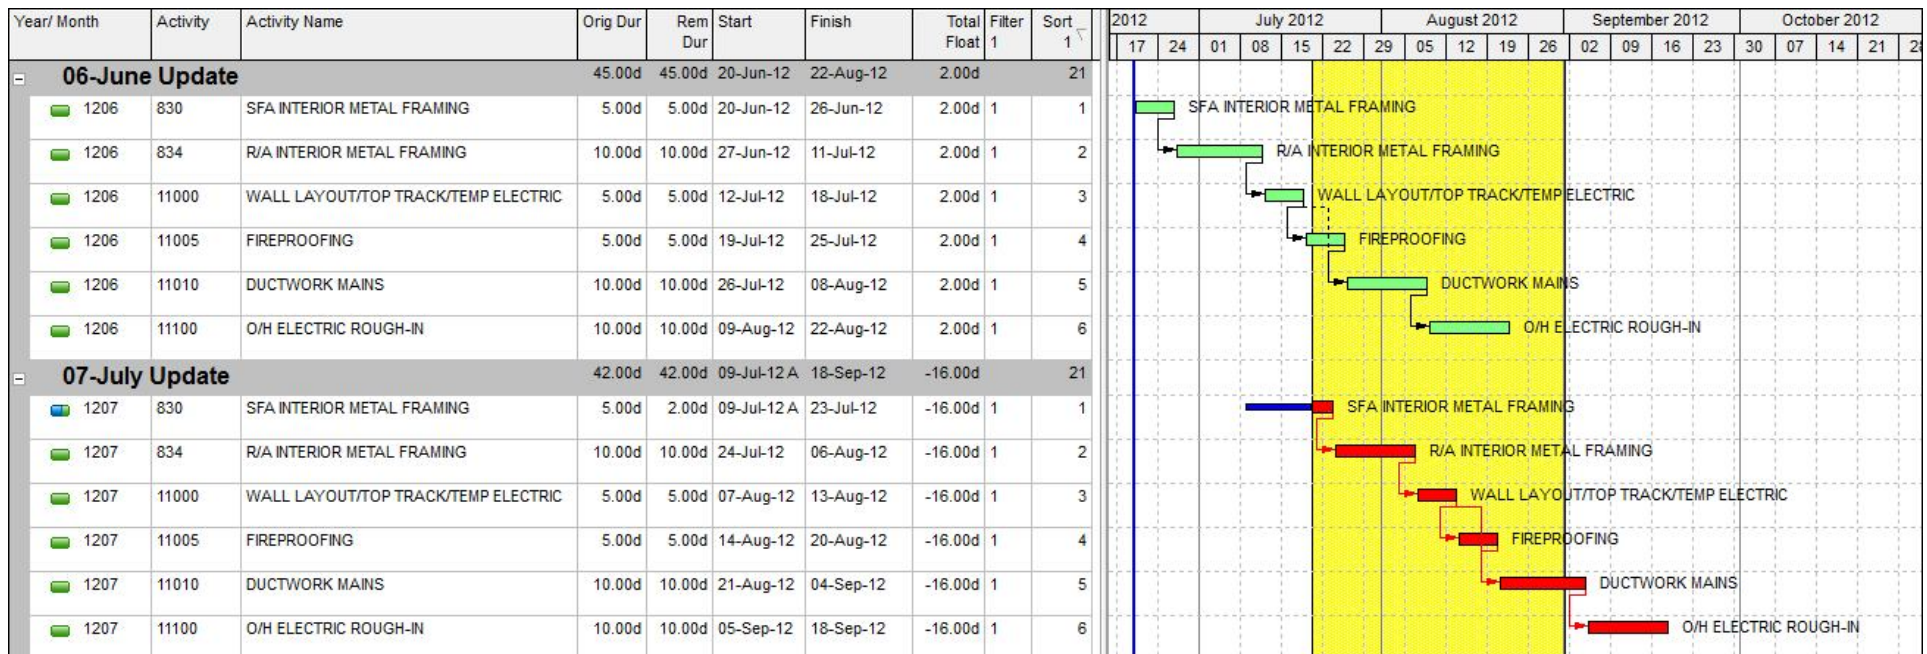

Sometimes we need something faster, easier and more flexible to help manage special presentation Layouts.

- User Defined Fields can be very flexible to use
- UDF's are Global Data, so you need to be careful on overuse.

User Defined Fields in Layouts

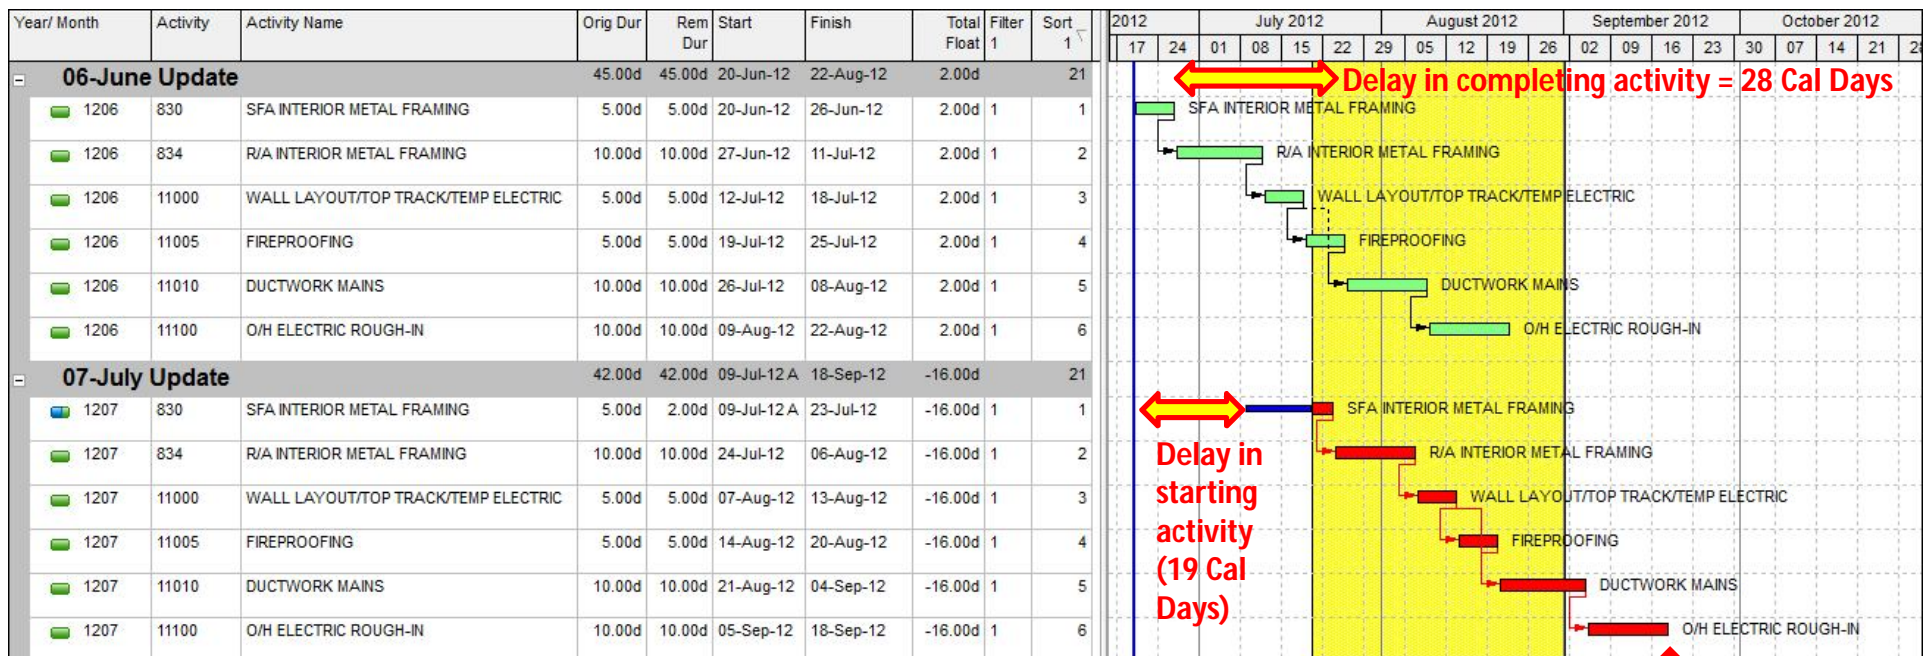

- In this Layout, we are comparing the current critical path with the activity status the previous month.

- The Filter UDF is used to manually select the specific activities to include in the layout.
- The Sort UDF is used to arrange the activities in a specific order that might not be possible with traditional sorting options.

User Defined Fields in Layouts

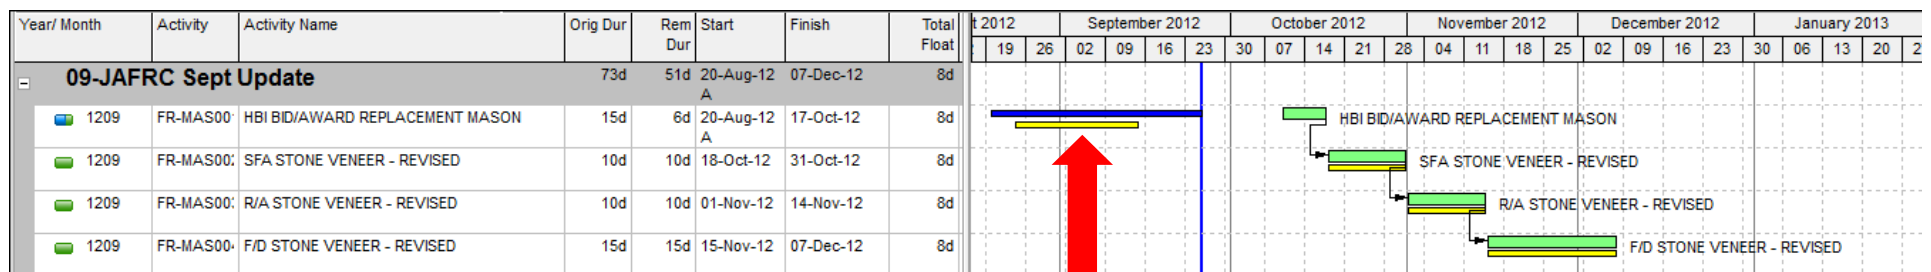

- The final Layout is captured (SnagIt) and pasted into PowerPoint and annotated for presentation to client.

- In the final presentation, the UDF columns are not shown. The UDF fields give you very specific control of the layout.

How to display the “True Current Schedule”

Occasionally, before recalculating a schedule I am reviewing (to determine if the schedule was calculated) I save the current schedule as a baseline and get a surprise or two.

The “Current” Date does not match the Actual Start and the Currently forecast Finish Date.

- Possible cause: When you status an activity, P6 saves the current ES/EF (at the time the activity is statused) as the “Current” Start and Finish dates.

How to display the “True Current Schedule”

Quick solution: Create User Defined Fields to capture the actual “Current Dates” with a Global Change. Then set up a Bar using the UDF’s to define the start and finish.

Year/ Month	Activity	Activity Name	Orig Dur	Rem Dur	Start	Finish	Total Float	Current Start	Current Finish	2012	September 2012	October 2012	November 2012	December 2012	January 2013
										19 26 02 09 16 23 30 07 14 21 28 04 11 18 25 02 09 16 23 30 06 13 20					
09-JAFRC Sept Update			73d	51d	20-Aug-12 A	07-Dec-12	8d								
1209	FR-MAS0010	3ID/AWARD REPLACEMENT MASON	15d	6d	20-Aug-12 A	17-Oct-12	8d								
1209	FR-MAS0020	SFA STONE VENEER - REVISED	10d	10d	18-Oct-12	31-Oct-12	8d								
1209	FR-MAS0030	R/A STONE VENEER - REVISED	10d	10d	01-Nov-12	14-Nov-12	8d								
1209	FR-MAS0040	F/D STONE VENEER - REVISED	15d	15d	15-Nov-12	07-Dec-12	8d								

Use Global Change to store the “current” dates in the User Defined Fields.

Modify Global Change

Select Subject Area: Global Change Name:

If	Parameter	Is	Value	High Value
<input checked="" type="checkbox"/>	(All of the following)			
	Where			

Then	Parameter	Is	Parameter/Value	Operator	Parameter/Value
	Current Start 1	=	Start		
And	Current Finish 1	=	Finish		

How to display the “True Current Schedule”

Year/ Month	Activity	Activity Name	Orig Dur	Rem Dur	Start	Finish	Total Float	Current Start	Current Finish	August 2012	September 2012	October 2012	November 2012	December 2012	January 2013
										19 26	02 09 16 23	30 07 14 21 28	04 11 18 25	02 09 16 23 30	06 13 20
09-JAFRC Sept Update			73d	51d	20-Aug-12 A	07-Dec-12	8d	20-Aug-12	07-Dec-12						
1209	FR-MAS0010	BID/AWARD REPLACEMENT MASON	15d	6d	20-Aug-12 A	17-Oct-12	8d	20-Aug-12	17-Oct-12						
1209	FR-MAS0020	SFA STONE VENEER - REVISED	10d	10d	18-Oct-12	31-Oct-12	8d	18-Oct-12	31-Oct-12						
1209	FR-MAS0030	R/A STONE VENEER - REVISED	10d	10d	01-Nov-12	14-Nov-12	8d	01-Nov-12	14-Nov-12						
1209	FR-MAS0040	F/D STONE VENEER - REVISED	15d	15d	15-Nov-12	07-Dec-12	8d	15-Nov-12	07-Dec-12						

Once the dates are stored in the User Defined Fields, set up a Bar to display the “True Current Schedule Dates” in the Bar Chart.

Bars

Display	Name	Timescale	User Start Date	User Finish Date	Filter	Preview
<input checked="" type="checkbox"/>	Remaining Level of Effort	Remain Bar			Level of Effort	
<input checked="" type="checkbox"/>	Actual Current Dates	User Dates	Current Start 1	Current Finish 1	All Activities	
<input checked="" type="checkbox"/>	Actual Level of Effort	Actual Bar			Level of Effort	
<input type="checkbox"/>	Tertiary Baseline	Tertiary Baseline E			Normal	
<input checked="" type="checkbox"/>	Actual Work	Actual Bar			Normal

How to display the “True Current Schedule”

Solution: Create User Defined Fields to capture the actual “Current Dates” with a Global Change. Then set up a Bar using the UDF’s to define the start and finish.

This Layout shows the “True Current Schedule”.

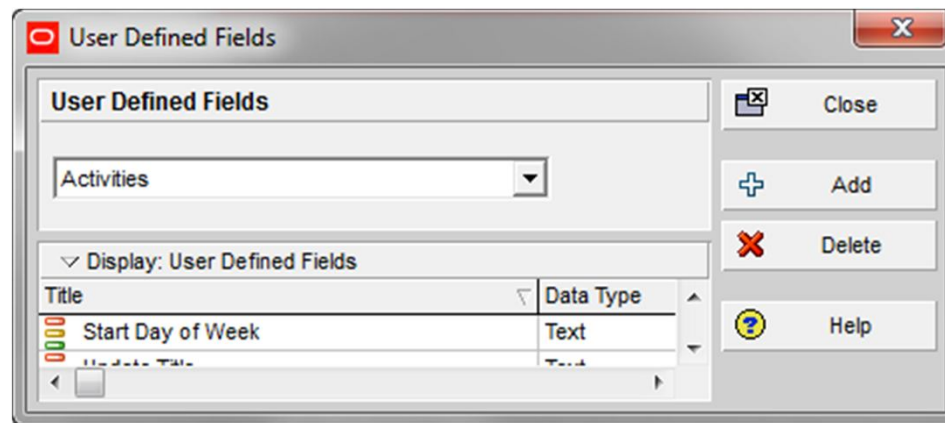

This Layout is useful when receiving a schedule submittal from a contractor and you want to calculate the schedule and check for variances after the calculation.

(Variances would be caused by modifying the schedule but not calculating the schedule before creating the submittal copy).

Set a “Day of Week” Column for Start

Add a “Day of week” column to make your tabular report or Activity Label communicate better.

- Create a User Define Text Field “Day of Week”
- Create and execute a Global Change that sets the UDF to “Day of Week” for the Activity Start Date.

- Create and execute a Global Change that sets the UDF to “Day of Week” for the Activity Start Date.

Modify Global Change

Select Subject Area: Activities Global Change Name: Set Day of Week

If	Parameter	Is	Value	High Value
	(All of the following)			
	Where			

Then	Parameter	Is	Parameter/Value	Operator	Parameter/Value
	Start Day of Week	=	DayOfWeek(Start)		

• Edit the “Parameter” to say “Start”

Else | Parameter | Is | Operator | Parameter/Value

Buttons: OK, Cancel, **Change**, Add, Delete, Cut, Copy, Paste, Help

- Review audit report

Global Change Report

Activity Steps – Detail for Summary Activities

Keeping the schedule from getting too detailed is a constant battle. Try “Steps” to capture detail within activities.

- Activity Steps can be used to define more detailed elements of an activity.
- Very useful when you want to limit the number of detailed activities but still provide visibility to detailed elements of the work.
- Steps can also be used to drive activity percent complete to support earned value metrics.

Activity Steps – Detail for Summary Activities

Keeping the schedule from getting too detailed is a constant battle. Try “Steps” to capture detail within activities.

The screenshot displays a software interface for managing project activities. On the left, a tree view shows the hierarchy of activities under 'Conv Conveyor System'. The 'Conv.D&E System Design and Engineering' folder is expanded, showing sub-activities like 'System Design', 'Review and Approve Design', 'Prepare Drawings for Conveyors', and 'Review and Approve Drawings for Conveyors'. The 'Prepare Drawings for Conveyors' activity is selected, and its details are shown in the main window.

The 'Status' dialog box for the selected activity is open, showing the following information:

Status	Start Date	End Date	Physical %	Total Float	Free Float
<input checked="" type="checkbox"/> Started	24-Jun-04		29%		
<input type="checkbox"/> Finished		07-Jul-04			
Exp Finish					0

The 'Steps' tab is selected, showing a list of steps for the activity 'Prepare Drawings for Conveyors'.

Step Name	Step % Complete	Step Weight	Step Weight Percent	Start	Finish	Compl...
Prepare draft drawings	50%	58.0	58.0	23-Jun-04		<input type="checkbox"/>
Department Review	0%	1.0	1.0			<input type="checkbox"/>
Engineering Review	0%	1.0	1.0			<input type="checkbox"/>
Incorporate Comments	0%	18.0	18.0			<input type="checkbox"/>
Final Review	0%	2.0	2.0			<input type="checkbox"/>
Camera Ready	0%	15.0	15.0			<input type="checkbox"/>
Publish	0%	5.0	5.0			<input type="checkbox"/>

The 'Camera Ready' step is highlighted in blue. A red arrow points from the 'Camera Ready' step in the table to the 'Camera Ready' checkbox in the 'Status' dialog box.

Dealing with “fractured durations”

- In this view, everything looks OK
- No reason to suspect any problems
- The final activity has more float because it's on a 7 day calendar
- But, let's take a closer look...

Dealing with “fractured durations”

Activity	Activity Name	Orig Dur	Rem Dur	Start	Finish	Total Float

- Go into User Preferences and turn on Duration decimals and Date: Display time.
- Now we can see some “fractured” durations and float values
- And the “Time” shows the “end of the workday” as 9:12 AM

Dealing with “fractured durations”

- Before submitting a schedule update, turn on durations decimals and display time to see if you have this problem.

Activity	Activity Name	Orig Dur	Rem Dur	Start	Finish	Total Float	2012		December 2012				January 2013							
							18	25	02	09	16	23	30	06	13	20				
3590	EXTERIOR SHEATHING - 2ND FL C	3.00d	0.15d	18-Oct-12 12:00 AM A	26-Nov-12 09:12 AM	-18.15d														
E1230	STOREFRONT 1ST FLOOR	12.00d	0.60d	18-Oct-12 12:00 AM A	26-Nov-12 03:00 PM	-24.15d

- Notice all the “12:00 AM” Actual Starts?
- Some schedulers insist that if you don’t “Turn on Time” that P6 will default to 12:00 AM dates for Actuals instead of the Calendar Start and Finish times.
- I’ve found that to not be true in schedules that originate in P6 but seems to be very common in schedules originating in P3 and then imported to P6.
- When you import from P3 to P6, always check your times and correct them (this is normal “cleanup” when importing P3 files).
- Always turn on “Display Time” to be sure you don’t have this problem.

Upcoming Events

Presented by the San Francisco Bay Area and Southern California Sections
HARRAH'S & HARVEYS CASINO RESORT
February 21st – 24th • Lake Tahoe, Nevada

For more information visit: www.aaceisf.org

All registrants to this webinar will receive the WWW Program in PDF format.

Dozens (45) of leading speakers in a wide variety of markets will be sharing experiences and knowledge in project controls.

This is a don't miss event!

DRMcNatty is proud to be a Marquee sponsor for one of the most important project controls events in the Western U.S.

PROJECT MANAGEMENT SOLUTIONS THAT SIMPLY WORK.
