

Title: Is PM Web a Contract Management Replacement

#	Question	Answer
1	So with the discontinued support for PCM 14, does that mean there will be no more development of the product?	Correct. 14.2 is the most current version. Once a product reaches "end of support" there's no more development and also no more "fixes".
2	Is PM Web an Enterprise Level solution? Has it been deployed globally for multi-projects (2000+) and can you give an example?	Yes. PMWeb has been successfully deployed all across the world. For specific references, please contact us direct.
3	How much effort was expended customizing the worksheet?	Jonathan answered: learning to use this part of the software and creating the worksheet took about 1/2 hour.
4	How are documents stored in PM Web? Do it utilize a file server or a platform similar to Sharepoint?	Default is on the file server but we can also integrate with any content management tool such as SharePoint.
5	Does the PM Web Viewer handle the attachments from PCM?	It can but must be programmed to do so.
6	There is no such thing as a perfect software, where does PM Web fall in your opinion?	I feel that PMWeb, while not perfect, was as good as it gets. I also found their support and development team to be very responsive to issues and recommendations that I raised.
7	Our company currently is using ProLog which is integrated with our Financial application (JD Edwards). Does PM Web integrate with 3rd Party Financial Softwares?	Yes it does. Sn integration toolbox is included. If you contact us direct we can see about getting a specific reference for you.
8	Is it easier or more complex in PM Web compared to Primavera Unifier for Business Process Creation?	It is definetly easier. Possibly less than 20% of the effort required in Unifier.
9	Does PM Web support Web Services?	Yes. PMWeb is MS SQL .Net based and accessible in a number of ways including web services.
10	Does PM Web support scheduling through P6 EPPM or Pro?	PMWeb can connect to either.
