

#	Question	Answer
1	Is Date and Author's Name entered automatically in the Discussion Tab on Team Member?	Yes. Date and User Name.
2	When was P6 R8.3 Released?	15-Apr-13
3	Will you also have control of the data while exporting? Same as Importing?	No. The new XMLPL features only work on Importing.
4	With Primavera Gateway, can you bring in Oracle information?	Yes. The tool will allow bi-directional connection of P6 to ERP systems such as Oracle, SAP, and others through configurable data mapping, including P6 Global Data.
5	Where can I read more about Primavera Gateway?	http://www.youtube.com/watch?v=O6qu4ER_cvo
6	Is Variable Date Range printing available, like months for 6 months and quarters or years after that?	Yes, Months is one of the choices for variable date ranges.
7	Can you assign multiple team members?	Any P6 EPPM user can also be defined as a Team member user.
8	What is the difference between Discussions and Notebooks?	Discussions are date and time stamped.
9	Does the Discussion Feature avoid RFI's?	Any increase in communication can help but RFI's are a more formal way of documenting communication.
10	Is there a way to print the Discussion detail? Also does this upgrade allow a better way to print text in the notebooks?	Discussions can not be printed through Layouts but Notebooks can be printed as Bar labels on Layouts. Both Notebooks and Discussions can be printed as P6 Professional Reports. We have not verified but expect that discussions could be printed on P6 EPPM BI Publisher reports.
11	Does it date and time stamp each discussion?	Date Stamp, not including time.
12	Can discussions be exported out along with the other schedule information as a separate field?	Only column shown in EPPM or Pro exports was for "Discussion read" but not the discussions themselves.
13	Is the separate launcher of Visualizer available from P6 Web Access?	No. Visualizer runs under Windows and would need to be loaded on the Windows workstation. Our tests indicate it runs on a standalone P6 deployment but not on a terminal server deployment.
14	Does Visualizer have a rolling option, or something similar?	You can do Data Date to Project Finish but can not define a "rolling window".
15	Does Visualizer come with 8.3 or do you need to purchase the additional software?	Yes, included with 8.3
16	Is the unread comments only in Professional?	Also in EPPM.
17	Is unread comments column feature also available in P6 EPPM?	Yes
18	Resource Summary data on Startup, why is this significant?	Loads schedule faster.
19	I have had an issue with Printing in P6 Pro 8.3. When I print a Gantt Chart I like to put some project details in the header, such as project name, customer, company logo, etc. I typically type these in manually. However, I have noticed that when I type these items, they do not show up. Whether I am in Print Preview and the page setup section, or if I just go to the page setup section, either way does not work. A P6 automatically generated item shows up fine, but anything I type does not. Additionally, it will not allow me to type the letter "S". Have you heard of these issues or is there a way to fix this?	We have several clients who have experienced similar issues with 8.3 and Oracle is working on this.
20	Do you know if there will be manual page breaks?	Have not seen this feature yet.
21	Can we utilize android smart phones instead of iPhones?	Oracle says that support for Android is due this summer.
22	Can you speak to the licensing requirement to get Primavera integrated with other applications?	Depending on the integration tool selected you may just need a webservice license or if it's an Oracle integration tool the license may be part of the tool. The answer is situation specific.
