

Title: ProjectStatus Update

#	Question	Answer
1	Can colors be modified on the Heat Map to account for disabilities, Color Blind? If so, is it user or application defined?	Yes..our Development staff would be able to adjust the colors as required.
2	Is the Dashboard View customizable or are users only going to see what was demonstrated?	Dashboard views are customizable to the extent allowed in the User Preferences. Customized views of information may be developed on a services basis by our Development team.
3	For the licensing model, is it required to have a P6 License, Web Services License or a combination of both for users to access?	Web Services license at minimum. Users with full use license are permitted access to ProjectStatus.
4	Can the risk scoring be different for projects or do they all need to use the same scoring method?	The risk scoring matrices are established in P6 by the system administrator and assigned to individual projects. It is possible for different projects to have differing risk scoring matrices.
5	Is there a delay between when information is entered into ProjectStatus and when it is available in P6?	No, ProjectStatus utilizes the P6 Web Services so all data entered via ProjectStatus writes to P6 in real time.
