PROJECT MANAGEMENT SOLUTIONS THAT *SIMPLY WORK* SINCE 1989.

www.drmcnatty.com

Thank you for joining today's webinar

- Mute – all call in phones are automatically muted in order to preserve the quality of the audio for all attendees.

- Questions – during the session, questions can be submitted through the Questions Box on the right side of the screen . We will try to address your questions at the end of the presentation, time permitting.

- Follow up – all registrants will receive an Excel file listing all questions and responses along with a link to the recorded webinar.

Safe Harbor

- The statements made in this technical presentation are based on our current knowledge of the tools.

- Our statements should not be construed to be an official "Vendor perspective", but are intended to be the sharing of technical and user knowledge gained as we explore new paths and technologies, usually in advance of our clients.

- You need to make your own judgments as to the application of our shared ideas in your own, unique environment.

Our Products and Services

- Project Controls System Implementation
- Cloud Based, Global Managed Hosting Services
- Software Training Services
- Integration, Analytics, Dashboards, Risk and Role-based User Access Tools
- Program and Project System Support Services and Partnering
- Mentored and Supported SB/DVBE Project Staffing Resources

Integration with Finance/ERP	Gateway		Integrator	Integrator		Gateway

- DRMcNatty supports these project controls tools as an authorized partner, trainer and implementer as well as providing trained and supported project staffing resources.

What's New in Primavera Unifier 16.1

With the release of Oracle Primavera Unifier 16.1 on March 31, we have deployed and are taking a closer look at this "Contract Management Cloud" configuration of Unifier that includes many new business processes and reports designed to provide Primavera Contract Management type functionality, out of the box!

This release of Primavera Unifier includes most of the "Contract Management Cloud Accelerator" content and much more! Templates provide for both an Owner and a Contractor perspective to streamline your initial deployment of Unifier.

With several implementations underway for long-time PCM clients, our technical team is providing an initial overview of Primavera Unifier 16.1 including a live demonstration of some of the new content.

"Contract Management Cloud"

Agenda

What's New in Primavera Unifier 16.1

- Oracle Primavera Unifier

- What's New in Unifier 16.1

- Expectations for "out of the box"

- Extras in Unifier 16.1 compared to PCM 14

- Live Software Demonstration

- Compelling Features in Unifier 16.1

- Unifier Implementation Steps

- Questions

Oracle Primavera Unifier

- "Skire Unifier"…, purchased by Oracle in 2012.
- Next step for Contract Management licenses.
- Cloud based Project Delivery & Asset Management.
- Full function document management.
- Cost management incl. funding, budgets, contracts.
- Linked change management business processes.
- Two-way integration with P6 through Gateway.
- Internal report writer as well as Oracle BI Publisher.
- Workflow driven with email interaction.

What's New in 16.1

- Unifier Mobile App for iOS with OFFLINE sync.

- Enhanced Business Processes and templates to match PCM type features.

- Improved Document Manager with "unlimited" file size and drag & drop uploads of files and folders.

- Java free for the most part – can be browser neutral.

- Enhanced integration with BIP for reports & forms.

- Enhanced P6 two-way integration using Gateway.

- Analytics **(not covered)**

- Facilities Management Enhancements **(not covered)**

What's New in 16.1

- Unifier Mobile App for iOS
  - English language only, no release date for Android.
  - Online/offline functionality (auto-syncs when connected).
  - Respond to assigned Tasks.
  - View business process logs in your projects.
  - Create new business process records.
    - RFI's, Daily Reports, Change Orders, more...
  - Business processes need to be enabled for Mobile App on the BP Configuration, General window.
  - Take photos and attach images to business processes.

  Live demo of Mobile App

What's New in 16.1

- PCM style Business Processes & Templates
  - Two preconfigured templates (Owner and Contractor).
  - Each template includes preconfigured business processes based on owner or contractor perspectives.
  - Contractors can collaborate with Owners on one side and Subs/Suppliers on the other.
  - Owners can collaborate with their team and insure security and traceability.
  - Enhancements to Summary Payment Applications
 - All business processes and forms can be modified.

What's New in 16.1

What's New in 16.1

Owner RFI Workflow

Contractor RFI Workflow
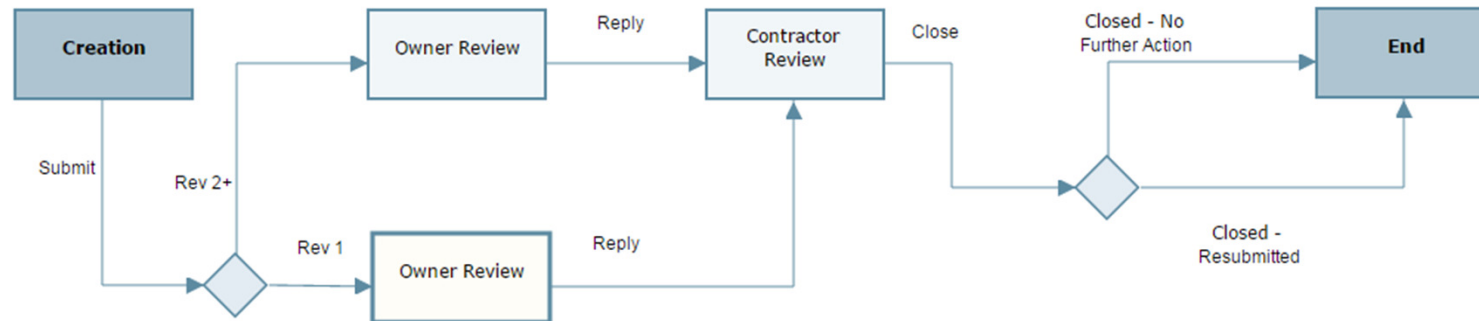

What's New in 16.1

- Improved Document Manager
  - File upload interface using HTML5 functionality.
  - Upload window now displays additional columns
    - File type icons and file size.
  - Unlimited file size (can be limited in Settings).
  - Drag & drop files (no Java required).
  - Drag & drop folders (in Chrome only).
  - Automatically creates zip files when multiple files downloaded.

What's New in 16.1

- Java Free – can be browser neutral
  - Interface consistent with other Primavera products.
  - Java applets used in intermediate and advanced file transfer have been removed.
  - Launches within the same browser window.
  - Supports multiple logins to separate tabs.
  - Multiple proxies so other people can act on your behalf.

  Hands on note:
  - Deploying with AutoVue does require Java for viewing.
  - Without AutoVue we've found viewing to be browser neutral.

What's New in 16.1

- Enhanced integration with BI Publisher (BIP)
  – Version 10 added Oracle BIP for running reports.
  – Version 15.1 added custom print templates using BIP.
  – 16.1 provides much better integration to Oracle BIP.
  – Forms & reports created in BIP can be run by users from within Unifier 16.1.
  – BIP custom forms can attach to email notifications automatically as PDF's.

Live demo of Email Interaction

What's New in 16.1

- ## P6 Integration Enhancements

  - ### P6 Summary Sheets in Cash Flow Templates

    - The new feature provides additional options in the Distribution and Schedule sections of Baseline and Forecast curve definition windows to select a <u>P6 source</u> and its associated data (or date) types.

Expectations for "Out of the box"

- Can I do everything I now do with PCM?

- Does it improve on what I have now?

- Is it easy to implement?

- Is it easy to use?

- How does Oracle support moving from PCM?

PCM/Unifier Comparison Matrix

Extras in Unifier 16.1

- Features not in Contract Management
  - Mobile App (iOS)
  - Complete workflows
  - Master Agreements
  - Document Management
  - Email interaction
  - Field level security

Live Software Demonstration

- Unifier 16.1 running from DRMcNatty data center in Irvine, CA.

- Jon McNatty accessing Unifier from Buffalo NY.

- Overview of 16.1 environment.

- Unifier 16.1 Owners Template perspective.

- Unifier 16.1 Contractors Template perspective.

- Compare to PCM 14.x

Compelling Features in Unifier 16.1

- Pre-built "perspective" templates.

- Pre-built Contract Management type Business Processes.

- Easily deploy for document management.

- Field application of Unifier Mobile with offline sync.

- Multi-level automated business processes.

- Expandability, for owners and contractors.

Expectations for "Out of the box"

- Can I do everything I now do with PCM? – **Close…**
  - Not all forms/reports there (or needed?).
- Does it improve on what I have now? – **Absolutely!**
- Is it easy to implement? – **Yes, if approached right.**
- Is it easy to use? – **It can be – requires more admin.**
- Does Oracle support moving data from PCM?
  - **While there is no direct "out of the box" link it does support export/import.**
  - **The data structures are different and require some manual data reconciliation before migration.**
  - **Consider a "BIP Viewer" approach to keep data in PCM.**

Unifier Implementation Steps

- Using Project Controls - Project Controls has been designed and configured for immediate use. These are steps you need to take to set 16.1 up:

  – Create projects using Project Templates.

  – Add users to the company.

  – Add users to company groups if they will participate in company-level activities.

  – Assign users to the projects.

  – Add users to project groups. Users assigned to groups inherit group permissions.

  – **KEEP IT SIMPLE** and grow into it.
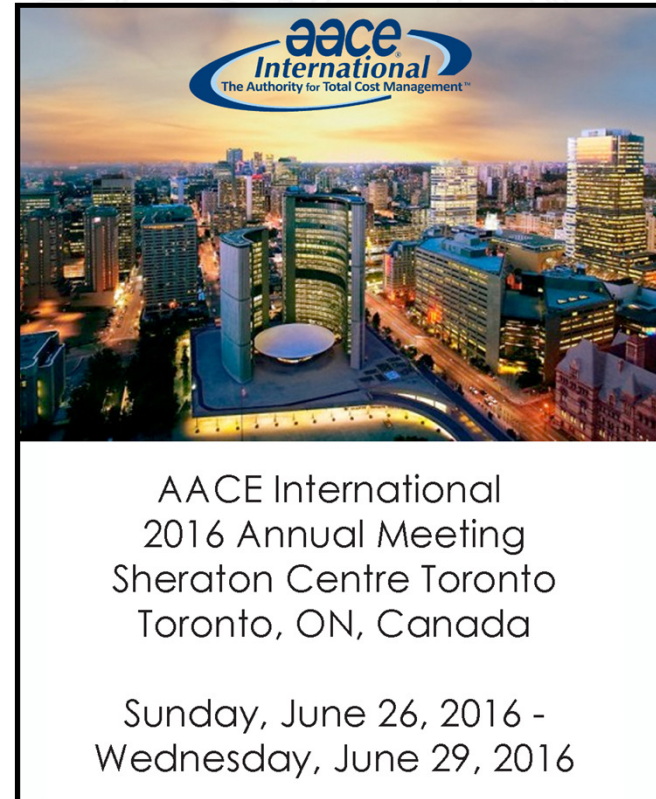

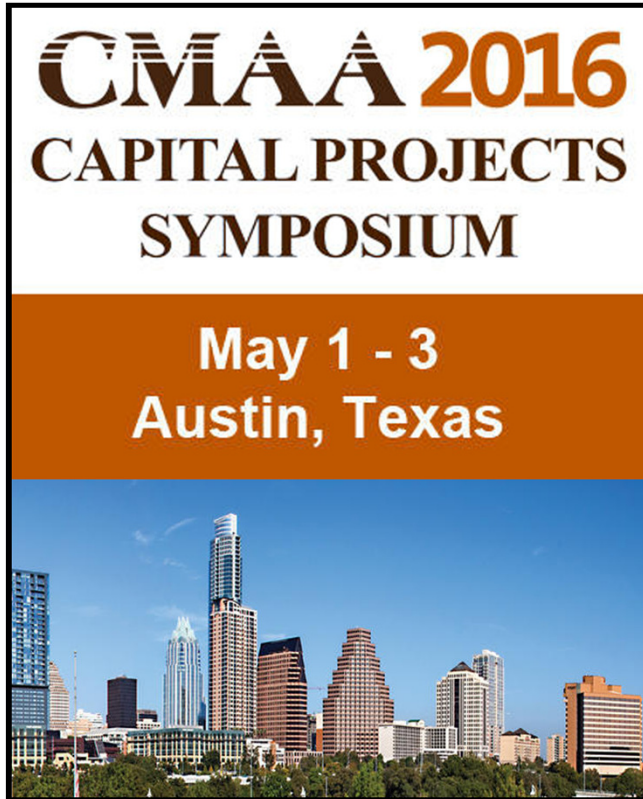

Questions & Comments

- All questions are gathered into a master sheet, answered and distributed to all registrants as well as posted on our website.

- Answers are based on our own experiences using the various software products covered in this webinar.
