CMI

Contract Management Interface (CMI) was developed by DRMcNatty to improve efficiency and allows customers to receive documents along with attachments, directly into their secured Oracle Primavera Contract Management (PCM) 13 or 14 database. Our customers have seen a substantial reduction in administrative work, improved project documentation, and significant cost savings.

This 100% Web-based (no Java runtime required) application resolves a common business problem for organizations that receive incoming documents and have to manually log them directly into PCM rather than provide the contractor full read/write access to the contract management database. With CMI, contractors have the ability to submit documents into PCM without direct access to the database.
FEATURES

- Browser-based, Internet access to submit documents into Contract Management
- Simple to use, no need for expensive training, just requires an internet connection and PCM license.
- Eliminates the need for your staff to manually enter documents, saving you time and money!
- Allows Owners and Contractors the security of separate interfaces
- Run reports to check the status of submitted items
- Automatic email notification and receipt for all document types
- Save on license costs with the CM "light" web service license
- Runs on any browser or device (iPad, Android, PC, Mac)

RFI	Request Status Log
Change Proposal	Change Proposal Status Log
Submittal Document	General Correspondence
General Correspondence	Status Log
Daily Reports	Daily Report Status Log

HOW IT WORKS

1. Log on

2. Select a document type

3. Fill in fields and submit

4. It is imported directly into Contract Management including all attachments less than 120MB
