

Title: Field Automation Communication Solutions (FACS)

#	Question	Answer
1	IS FACS software OOTB or does it require a lot of configuration?	<b>FACS is an out-of-the-box solution. Standard services exist, like RFI, Submittal, Diary and etc. Configurations are requested by clients and put together by FACS prior to deployment.</b>
2	How is FACS deployed? On-premise/cloud/hosted?	<b>FACS is a cloud-based SaaS solution</b>
3	Does FACS integrate with other programs? i.e. Schedule, Cost and Financials systems	<b>Absolutely. These are simply integration requests and are addressed individually.</b>
4	What is the implementation time frame for users to Go Live from contract execution?	<b>For a standard client FACS can be up and running within 24 hours. More complex configurations or customizations can lengthen that time frame.</b>
