Questions from April 2018 Tech Webinar

Title: Mobile Scheduling is Here

Presented by: Jim Lee, HITO Management

#	Question	Answer
1	Do users need a P6 License or access to P6 to view and update schedules in Site Walker?	No. Users are able to view and update information in the xer file within SiteWalker.
2	Is there a Free Trial of the app available?	Yes. 30 days free trial is available. For a larger team or case study, longer trial periods are available. For a Free Trial, https://get.sitewalkerapp.com
3	Can fields in the app be locked out? For example, we would not want the updater to edit the remaining duration.	Fields cannot be locked out at this point. Remaining duration can only be changed on activities in progress.
4	In the notes section, does the app have talk to text capability?	If the phone's keyboard has a voice to text capacity, SWA should support it.
5	What Primavera P6 Percent Complete does the app map to in P6?	Whatever the activity type is set to within P6.
6	Can Code Values be used to filter activities that the user has access to in the app?	We have considered using all the current filters as a permissions module, but we have not developed or implemented it.
